

Public report excerpts

Holly Hill Police Department - Case HH260001521

Officer badge and patrol-vehicle keys theft investigation

This is not the complete 12-page report. It contains selected scanned pages from the public-record copy provided to CFL Report.

Original printed pages 2, 5, 7, and 8 are omitted because they contain private contact, residential, birth-date, or vehicle-identifying details.

The original page numbers remain visible on each included page.
For the full account and context, see the accompanying CFL Report article.

NARRATIVE

On 08/16/26 at 0800 hours while on the scene of a death call Officer Julio Liriano informed me he needed to speak with me. Officer Liriano advised that last night he went out drinking and now his department issued badge was missing. Upon speaking with Officer Liriano further he advised he went to the Drunken Duck bar around 1945 hours, he parked his blue Alfa Romeo passenger vehicle facing northbound towards Townline Bar. At around 2045 hours Officer Liriano went back to his car to retrieve tobacco and then he stated he believed he locked the car doors before reentering the bar.

Officer Liriano then went to the Townline bar and spent some time there he then went back to his car around 2400 hours and went home. Upon arriving home in Ormond around 0030 hours, he realized his gray and black True Religion bag was missing with his house keys inside. He then returned to the Drunken Duck and asked the owner if anyone had turned them in or if there was any video surveillance the owner advised there was no video or keys turned in.

Officer Liriano then arrived at work this morning for his assigned day shift and informed me at 0800 hours that his department issued badge was missing and his keys to his assigned patrol vehicle had also been taken. I then asked Officer Liriano if he thought he had lost

- Incident Report (Cont.) -

the items or his car had been broken into he stated he was unsure. I then informed Lieutenant Weiss of what had occurred and he informed me to have Detective Bernal assist me with processing Officer Liriano's personal vehicle to find any evidence to what had occurred due to Detective Bernal being already on scene for a separate case.

Officer Liriano allowed us to process the vehicle upon entering it we located two plastic car parts that Officer Liriano advised were not his and did not know how they had ended up inside the car.

Detective Bernal processed the vehicle and multiple latent prints of value which will be sent off. The vehicle did not show any obvious signs of tampering or forced entry.

The stolen items are as follows,

- 1 Holly Hill department issued Officer Badge
- 1 True Religion bag with miscellaneous items inside
- 1 set of Holly Hill department issued Ford keys

Detective Bernal and I will be checking the area for surveillance cameras to see if they captured the incident on video. A county wide Bolo will be created for the stolen badge.

BWC Recording

Marsy's Law Invoked

Investigative Leads:

Location: Drunken Duck Brewing Company & Townline Lounge

Timeline: 1945 hours to roughly 0000 hours

Suspect (s): Unknown

Method of Entry: possibly unlocked vehicle

Point of Entry: possible passenger side door (s)

Items Taken and Value:

1. True Religion Monogram black bag with "U" on the side- No Serial Number
2. Gerber folding pocket knife, gold-colored handle- No Serial Number.
3. House Keys- described as a normal key ring, with two gym passes attached.
4. Along with other miscellaneous items within - Total approximate value for these other items is \$150.00.

- Incident Report (Cont.) -

V1 also requested his information remain confidential via Marsy's Law.

I then responded to V1's residence, where I processed the vehicle for latent fingerprints.

I was able to recover fingerprints from the front passenger door, including near the exterior door seal/weather strip, the window, the interior front passenger door handle, the passenger A-pillar top of the doorway area, the passenger B-pillar area, the rear passenger door window, the D-pillar/back window area, the bottom quarter panel, and several other spots.

The prints were recovered and later submitted as evidence.

Elimination prints were also collected and submitted as evidence. The prints and areas were photographed, and the photographs were later submitted as evidence.

On the front passenger seat floorboard were two unknown black car parts that V1 advised were not there previously. These items were also collected and submitted as evidence for further processing.

Sergeant M. Rosabella was notified and responded. Please refer to his report for further details.

While this was going on, additional Officers responded to the area of the incident in an attempt to locate any of the items but were unsuccessful.

Sergeant M. Rosabella and I later responded to the area of the incident, where we conducted a neighborhood canvass, which yielded the following:

- Drunken Duck/complex:
- No exterior cameras for the Drunken Duck
- East side of the complex: No exterior cameras pointing towards V1's vehicle.
- There are two cameras on the far east side near Riverside Drive, but will get with the property owner to see if they captured anything.
- West side of the complex: Cameras located at the corner of the building; will follow up with the business.
- Backside of the complex: No cameras outside.
- Checked the dumpsters and other trash receptacles within the area; yielded no results.
- Townline Lounge: Has exterior cameras, but the manager was going to return and check if anything was captured.
- Checked the dumpsters and other trash receptacles within the area; yielded no results.
- 120 2nd Street: Business has cameras pointing in the general direction of this incident, but no one was on scene to speak with. Will follow up.
- 128 2nd Street: Two residents were outside throughout the evening, and did not observe anything suspicious.
- No video surveillance cameras.
- One resident advised there was a transient who was described as a white male, gray shirt, black pants, large green backpack (military style), red bicycle, who drove through the area twice. The resident mentioned they were unsure whether this subject was related to the incident.

- Incident Report (Cont.) -

5 of 11 labeled "front Pass door" – No value

6 of 11 labeled "Passenger Door handle" – No value

7 of 11 labeled "Latent Print from Rear Pass Door." – No value

8 of 11 labeled "Latent from Rear Pass. Door" – No value

9 of 11 labeled "Rear Pass. quarter Panel" – No value

10 of 11 labeled "D-pillar" – No value

11 of 11 labeled "D-Pillar area" – Of value, searched in Local/BIS/NGI with negative results

Added to the unsolved latent database

The item was remanded to VSO Evidence.

Definitions:

Of Value – the determination that there is sufficient observed data; however, a search in Local/BIS/NGI concluded with negative results. *(Enough information to search, compare and identify if known prints were available)*

Identification – the determination that there is sufficient quality and quantity of information in agreement to conclude that two friction ridge impressions originated from the same source.

Inconclusive Due to Insufficient Knowns – the determination that the observations do not provide a sufficient degree of support for one proposition over the other due to an absence of complete and legible known prints or lack of palm prints. *(Known prints are needed to proceed with possible comparison and/or identification)*

Inconclusive Due to Insufficient Detail in the [Latent/Patent/Plastic] Print – the determination that the observations do not provide a sufficient degree of support for one proposition over the other due to lack of quality and quantity of detail observed. *(Not enough information to determine a conclusion)*

Support for Same Source – the determination that the observations provide support for the conclusion that the impressions originated from the same source rather than different sources; however, there is insufficient support for an identification. *(Shares features in agreement with listed individual - for investigative lead purposes only)*

No Value – there is insufficient observed data to affect an identification or conduct a comparison. *(Not enough or no ridge detail to proceed with comparison or searching)*

ACO – Additional Capture Of: A singular impression that has been captured multiple times (lift card, photograph, etc.). *(Duplicate)*

STORM ABIS – The STORM Automated Biometric Identification System is a web-based platform utilized for the storage and searching of tenprint and palm print records within the Local Volusia Sheriff's Office, FDLE (BIS), and FBI (NGI) repositories.

Local – A computerized Volusia Sheriff's Office repository housed within STORM ABIS for storage of tenprint and palm print records.

BIS – A state level computerized repository for searching, comparing, and storing tenprint and palm print records maintained by the Florida Department of Law Enforcement (FDLE).

NGI – A nationally automated fingerprint identification and criminal history system maintained by the Federal Bureau of Investigation (FBI).

- Incident Report (Cont.) -

On Monday, August 24, 2026, I, Detective Anthony Bernal, was notified that the Volusia County Latent Print Unit had made an identification regarding the previously submitted latent prints. The report indicated the following:

Out of the 11 latent prints submitted, one matched the Victim's prints.

No new leads were generated as a result of this at this point.

This supplemental report was generated to document this update.

Case Status: Unchanged / End of Narrative.

On Monday, August 17, 2026, I responded to 2100 LPGA Blvd, Daytona Beach, the 7-Eleven, and contacted the on-duty manager. I requested a review of their video surveillance cameras to determine whether anything V1 alleged was captured on camera.

After reviewing the footage, it was evident that the cameras were ineffective because the lighting washed out the image and the camera quality was poor. I couldn't identify any vehicles at the pumps or any movement around them during the timeframe provided by V1.

I received a phone call on my desk line from the business manager at 120 2nd Street. He advised that his cameras only capture his business parking lot, but he would review the footage to see whether anyone was seen walking through the area with the stolen property. If anything was captured, he would contact me.

I contacted the business manager for the complex at 101 2nd Street by phone and asked about any video surveillance footage; he informed me that there are currently no cameras. He was asked whether anyone had turned in any of the stolen items, and he advised that no one had.

Detective D. Walker and I responded to 235 Riverside Drive, where we contacted the property manager for the plaza in front of the Mariana Grande Towers. The manager allowed us to review video footage, but due to the angle, the time of night, and the lack of exterior lighting in the area, very little was visible. He informed us that he would have his partner send us the video, hoping that reviewing it on a computer would yield better results.

I checked social media and several police databases to see whether anyone was selling the items online or had pawned them, but found no results.

On Tuesday, August 18, 2026, Evidence Technician P. Santos and I responded to the Ormond Beach Police Department, where their Crime Scene Investigation (CIS) unit assisted in processing the car parts for latent fingerprints and touch DNA.

Evidence Technician Santos later completed a supplemental report documenting the specific processes utilized by Ormond Beach's CSI.

- Incident Report (Cont.) -

Later in the day, I received a flash drive containing video surveillance footage from the Marina Grande Plaza across from the Townline Lodge. I began reviewing the video footage, but it yielded no additional leads. The footage was later uploaded to evidence via Axon Capture.

On Wednesday, August 19, 2026, I conducted a follow-up investigation and responded to 101 2nd Street, where I contacted an employee at Chucherias Fine Dining. The employee reviewed the video surveillance footage and confirmed that the security cameras did not capture anything.

I then contacted the owner of the Drunken Duck and the bartender who was working Saturday night. Both confirmed that no one had turned anything in and that they had not heard anything. Additionally, the owner, Curt, advised that on Saturday, when V1 questioned him about cameras, he assisted V1 in rechecking his vehicle but was unable to locate the bag or other items. Curt informed me that he touched the vehicle, so his prints may have been picked up when I processed the vehicle, but his prints would be in the system due to his being a former deputy. The bartender advised that V1 never brought the bag inside; he only brought his Zyns/Nicotine.

I contacted a manager and bartender at the Townline to see if anyone had any further knowledge, but they didn't. While speaking with them, they double-checked whether anyone had turned in any of the items, but no one had. They further confirmed that no footage of value was captured by the video surveillance system due to poor lighting and a gutter downspout that blocked part of the video frame.

On Monday, August 24, 2026, I received a response from the Volusia County Latent Print Unit stating that the recovered latent prints either belonged to the victim/reporting party or were of no value. A copy of the Latent Print Unit's report was later attached to this investigation.

Between August 24 and September 21, 2026, no new leads have emerged. I re-checked multiple police and pawn databases without finding any additional information. Several officers contacted local business owners, but none reported recovering "found property" or anything related to the stolen items. Additionally, no new surveillance footage has surfaced that provides further insights.

Due to the lack of possible suspects and the exhaustion of all known leads, this case will be placed in suspended status.

The victim was later provided an update regarding the status change.

This report was later generated documenting the above information.

Case Status: Suspended / End of Narrative.
